PRESIDENT'S PROCLAMATION.

Although I have contended, that the sereral States which compose this Union, are free, Sovereign and independent, yet let no one suppose, even for an instant, that in asserting their supremacy, I mean to deduce from thence, their emancipation from any obligation. A State must be constituted by rational and accountable beings; and although but an ideal creation yet as it can only think and act through its members, it must bear their character. It so becomes a moral and accountable being itself, bound by every moral obligation which attaches to man as an individual and even in a higher degree.

I certainly do not concur with the learn

I certainly do not concur with the learn od author of this Proclamation, in the new precepts of ethics or of public law which he announces therein, when he says, "a birding obligation that has, no sanction, may be broken with no other consequence than moral guilt." Or when he infers from that p stulate, that as "a league be proceeded. tween independent nations, generally, has sauction other than a moral one; or, i Willy error (Kit is one) proceeds; prop My, from my litter incapacity to compre-bend what is meant by moral guilt, or by al sanction. To my dutl apprehen eion, moral guilt appears very like a true fulsehood, and by moral sanction I mus believe is meant physical morality. I doubt not however, that all those who can understand what this State paper means, when it speaks of "aggregate character, or of "a nation for certain purposes," will as easily discover what it intends by mora guilt and moral sanction. Nay, as for-merly we have been taught to understand the possibility of a constructive journey, and of moral Treason, we may expect to hear in some commentary upon this pan dect, of constructive and so unaccountable Representatives, and of the transfer of mo

According to my old fashioned notions of Morals and of Law, there is no human obligation wh ch attach to individuals or to states: nor does the existence of any common cism, to speak of obligations that do not oblige; and that which obliges the obecism, to suppose that the sanction of igation, was to be found in the precepts of morality only; for as these precepts constitute mere obligations themselves, one obligation would so become the canction of another. In such a case, it might probably puzzle the acumen even of those who can comprehend the theory of moral guilt, to decide which was the obli gation and which the sanction. And if the existence of some common superior, was the obligations contracted by States, could never be rightfully enforced by other States, so long as the equality of States is conceded. Yet no man before this author, has ever doubted the existence of such a

It would be foreign to my present pur pose, to enquire, what is the sanction of national obligations, or by whom, or how, or when, these may be applied and enfor ced. I may, perhaps recur to this subject hereafter. At present, it will be only Cessary to say, that it is not morality merely, but the law, that gives the sauction of all human obligations which deserve that name. This law must be administered by human agents, who can employ none othe than human means. In the case of individuals, it is the municipal law of their coun perfect obligations. This law is administered by Magistrates only; but its sanc tions although declared by them alone, mus have been torced, when necessary, by the power of mere men. In the case of States, it is the public law of the civilized world which gives the sanction of the obligations States alone; and the sanctions declared by it, must be applied and enforced, when subjects, who, as in the former case, are cases, the preservation of human Rights, proaches to it are all true and sustained; formed between any State and its Co-phare of the "spoils."

Power. But until this guardian becomes his own word, power and right will not be contounded, any more than the obligation with its sunction, or either with the physical force that may possibly become neces sary to apply the one or to enforce the other. If a state as a moral being may contract obligation, as an accountable being it is obliged to keep its faith, and to observe the promise it has given. Should it refuse to do so, it incurs the guilt of violated faith, ment of such guilt, which may then be rightfully inflicted upon. By whom, or when, or how, I will hereafter enquire. Whether this sanction prove efficacions or the performance is co extensive with the not as a sanction, cannot after either the guilt or the right. The unknown or fugi-tive malefactor, who so escapes "unwhipt of Justice," cannot thus convert his crime

into what this author would perhaps call moral guilt; nor must the powerful subject, who successfully resists the lawful commands of his Sovereign, and so prevents their execution, flatter himself with the hope that he is but a moral traitor. The name of the State which violates its faith ecomes the by-word of the civilized world. The decree delenda est Carthago will be are but vice-gernents of Him who delights in Justice, this decree must be executed -not perhaps in the first, nor yet in the se-cond Punic war, but Carthage must fall, and fall by human means too, for Carthage

With this solemn truth deeply im opon my heart, and with this awful examupon my neart, and with this awill exam-ple full in my recollection, I will proceed briefly to enquire, whether the Sovereign States who compose this Union, have pled-ged their faith in regard to it, by the Federal Constitution; to whom that pledge was given; what was the object and exten of the pledge; by whom and how it may be violated; and what are the legitimate effects of such a violation. I will not argue the first question. It would be an insul to every American, to suppose that he ever had doubted, or could now doubt, upon this subject. We all admit, that the States by their several ratifications of the Constitution of the United States, pledged their faith, and severally promised that it should be binding upon their people.

To whom was this pledge given? It could not possibly have been even to the

Government of the United States. This did not exist when these ratificati had; and the very object of the ratifications was to create it, to preserve it, and to a mend it, when the Sovereign parties saw fit to do so. The pledge was given by each State to its Co States; was given and received to and by each mutually and re ciprocally; the pledge of one being the deration of the pledge of another .-These mutual and reciprocal pledges, con which, whether it may be more properly called "a league"—" a compact"—or " an agreement"—I willingly leave to the leared author of this Preclamation to decide Nor is it of the slightest importance to my present purpose, to enquire, whether a Cov-enate made by a State with its Co States, having for its object the establishment of Sovernment, is more or less solemn, than if the object of the covenant had been to establish an Alliance, or to do any other act. If it be a Covenant at all, I admit. that the faith of the contracting Sovereign that what it may. Nor would it be less a nor am I disposed to concede less than promise was made by every ratifying State, to its Co-States, and by no possibility could have been made to a mere Government, which at the time of the promise made, had not, and by possibility ne ver might have had, any actual existence. If this is so, the Constitution of the United States, is a covenant between the several Sovereign States by whom it was ratified. to which covenant the Government thereby created is not, nor by any possibility could

be a party. To ascertain what was the object and extent of the pledge, we must look into the instrument itself to which the ratifications of the several Sovereigns refer. We shall there find, that to attain certain great and enumerated objects, a govern-ment was to be ordained and established endowed with certain enumerated powers for the attainment of the enumerated obects. Therefore, the faith of the parties was pledged, each to the other; to create such a government, endowed with such powers, to be exerted for such purposeso continue and maintain this government n the free exercise of all these powers. support this Constitution. Further than at this day, can suppose the faith of the sovereign parties was ever pledged.

it is asked, how and by whom the faith plighted by the high co ntracting parties, in their severa! ratifications of this their covenant, may be violated? The answer seems, at the first view of the question, to he not so easy. Yet there is no real diff- ded and given. iculty in the way, provided our first ap-

must be entrusted to the hands of human for this answer, will be found but a correlPower. But until this guardian becomes lary from the former conclusions.—Thus than by some of the Sovereign parties to when it is asked, how this Covenant may that fovenant, o as to make the violation with vertical transfer of the source o when it is asked, how this Covenant may be violated? the general answer, is obviously this. It may be violated, by the refusal or neglect of any of the parties, to do any of the several acts, which they have respectively stipulated in the covenant, that they would do; or by their doing any of the several acts, which they have respectively stipulated, in the covenant, that they would not do; and it cannot be violated by them in any other mode. not be violated by them in any other mode.

> this covenant be violated? by some of the parties to it only. If all are and preservers, and agree to disregard it, this is no violation, but a mere justinable change or avoidance of the Covenant, by the parties who made ish it, at their will. Nor is it of the slight ave at pledged their faith to support and est consequence, when the parties all concur, whether the change or avoidance of the covenant is effected in the mode there. in prescribed or not. For, no one of its ing then done in virtue of their authority, parts, is more obligatory upon the faith of to take effectual steps to prevent the repethe parties, than any other; and they fitted of such an abuse, and if it may be have the same right (all agreeing) to abro-proceedy required, to make reparation for sate the part gate the part prescribing the mode in anyinjuries that may have been sustained which alone it may be amended, as to from what has been done under color of change any other part of the instrument. The whole is but a promise made by each edand appealed to, refuses or neglects to all; and all can as rightfully ancul the dahose things, it thereby adopts the act promise of each to themselves, as any individual may cancel at his pleasure, a promise made to himself.—Neither is it possible, for any other than a party to violate any Covenant. For if this was possible, the faith of parties would not depend upon their own will and ability, but upon the will of others over whom they may have of our laws, the division of our people, the vigor accountability of our magistrates, the policept. Strangers, not parties to a cover accountability of our magistrates, the policept. Strangers, not parties to a cover and, may by other acts, prevent the partiform fulfilling its obligations upon them but such acts of strangers, constitute to violation of these obligations for none and violate it but such as the obligation of these obligations of the policept of the states with its can oblige any others. Then, the Covenant is the Sovereign parties and the saith of States, would have any of this was not so, the peace of Mations and the faith of States, would have upon the wit of man has ever produced, I must partie to the will of every incendiary ruffian who was at the disgrace of the community of the will of every incendiary ruffian who was at the disgrace of the community of the will of every incendiary ruffian who was at the disgrace of the community of the will of every incendiary ruffian who was at the disgrace of the community of the will of every incendiary ruffian who was at the disgrace of the community of the way of the covenant the way of the way of the covenant that was a the disgrace of the community of the way of the covenant the way of the covenant the way of the way of the second the covenant the way of the way of the way of the way of the covenant the way of the covenant the way of the covenant the way of the way of the covenant the way of the covena any Covenant. For if this was possible, eal from one Sovereign State to its Co-the faith of parties would not depend then states, must be very rare indeed. The

Caleb Johnson vs. Isachar Kinderdine ef alias -- District Court of the United States. Present, Judges Baldwin and

The attention of the District Court of the United States, has recently been engaged in the trial of a suit growing out of the apprehension of a runaway slave, by his owner. The substance of the evidence, detailed by the witnesses, is as follows:

In the year 1822 a party of four citizens of New Jersey, came into the State of Pennsylvania, and took from the service of the person with whom he was then liv-ing, a black slave, named Jack, whom they ty some time previously, and after ma ling him, pla the supposed intention of running him from the bounds of this commonwealth. On their way from the house they were as-saulted by a multitude, headed by Mr. Isachar Kinderdine (the individual with whom the slave was living at the time,) and having been seriously injured from missiles thrown by this mob, the party in missiles thrown by this mon, the party had the wagon were compelled to stop, in consequence of a blow received on the head, by Caleb Johnson, the master of the negro—the slave taken from their pessession the gentlemen who had come merely to reclaim their property, were taken into custody, and the plaintiff in this suit committed to the jail at Norristown, to snawer

mitted to the sail at Norristown, to answer to the charge of felony, before the proper county court. His trial took place accordingly, and he was honorably acquited.

On these grounds Caleb Johnson has brought an action of damages against Isachar Kinderdine et alias, who participated in that violence, before atted to have been done to his person. The charge of Justice Baldwin, was eloc quent and conclusive, and afforded a stri-king commentary, on the recklessness of those who assert that the North is interfering with the peculiar property of the South: he expressly informed the jury, that a master has the right of arresting his slave, without a warrant, and carrying him before any compotent tribunal, in order to prove his property, that he is not one, except those of the legal magnetrates, and that parole evidence is sufficient to show the validity of his claims in the absence of a bill of sale. His address was sence of a bill of sale. His address was adverse to the defendants, and should be spread widely, for it would have a powerful influence in allaying the fears of one section of the country on this subject. The jury gave a verdict for plaintiff, and awarded damages at \$4000.

Nullification was in existence before Mr.
Cathonn's day, or were Mr. Jefferson's. Calhoun's day, or even Mr. Jefferson's. The following Resolutions of Patrick Henry, which have been kindly furnished us by our valued correspondent, "Palmetto," sound very much like Nullification. bey are of course nonsense and tre son but as mere matter of history, we lay hem before the reader, and refer the commentaries of those two wise men Andrew Jackson and Thomas Ritchie.

"On the 28th of May, (1768,) the As sembly of Virginia passed strong resolu-tions against the Stamp Act, the substance of which was readily adopted by the other provincial legislatures. Popular pamph lets were published in abundance in repro bation of the power thus assumed by the British Parliament; and the proprietors of newspapers, whose journals were destined to be burdened with a stamp duty, raised against the obnexious statute a cry which resounded from Massachusetts to Georgia. The oppressive measures of ministers were canvassed in town meetings and in every place of public resort; and the limits of the obedience due to the parent country were freely and boldly discussed in every company. In these proceedings the colony of Virginia led the way, by pass-ing in the House of Burgesses, at the mo-tion of Mr. Patrick Henry, the follow-

At the close of the Revolutionary war, Arnold, the traitor, accompanied the royal army to England. "The contempt that followed him through life, says an elegant writer, is illustrated by the speech of Lend Lauderdale, who, perceiving Arnold on the right hand of the King, and near his person, as he addressed his parliament, declared on his return to the Common. eclared on his return to the Comm that however gracious the language he had heard from the throne, his indignation could not but be highly excited at beholding, as he had done his majesty supported by a traitor." They further state that the cotton manufacture is increasing in Prusia, the Rhenish provinces, Lombardy, Austria and Saxony; that in all these countries the wages of labour are decidedly lower than in Eugland; and that the repeal of our import duty is absolutely necessary to check their growing competition, and diminish the temptation to invest capital in the erection of factories on the continued, may it is much fearied, be simplied in part at least by Englishmen. As to the impolicy of subjecting to a heavy tax the raw material of, by far the smoot important of our manufactures, the memorialists observe that they consider it needless to any much, that impolicy having, at the time of the recent augmentation of the tax, be in frankly and fullund, mitted, both by the noble Chancellor of the Racheguer, and the right hon. Vice president of the board of the fanish year there will be such a surplus revenue as to admit of some reduction of rezation, relief may be astended to the zotton manufacture by the removal of an impost which is not only from its very nature repugnant to every principle of political economy, but in its principal operation tends to expose to hazard and injury that branch of trade on the prosperity of which, for more than that of any other of our manufactures, depends the employment and comfirmable subsistence of our laboring population. BALTIMORE, Priday Morning, May 17. 1833. Baltinors, Friday Morning, May 17, 1833.

Much expectation and interest was excited yesterday among the gentlemen of the Furi, by an inside stake made up for the New York Races, by Mr. Johoston, Mr. Steven's Mr. Wynn, and other subscribers. They are all alive to the contest likely there to ensue between Mary Randolph, O'Kelly, Goliah, Miss Mattie, &c., at Long Island the last week in May, and it is calculated, that it will excite as much interest, and bring as many visiters to the May, and it is calculated, that it will excite an much interest, and bring at many visite to the course, as did the celebrated race of Henry and Eclipse. This contest will take place on the day of the Jockey Club purse, four mile heats, and as each has a right to name at the post, and remains spen to the day of the rices I do not doubt we shall have such aport as it has been rare to witness.
